Claims 1-11: (Cancelled)

Claim 12. (Previously amended) A graft having enhanced thermal oxidative stability, comprising:

(a) a basestock grafted to an antioxidant additive

(b) the basestock is selected from the group consisting of mineral oils, polyol esters, polyalpha olefins, fuels, oligomers, polymers, copolymers and mixtures thereof; and

(c) the antioxidant additive comprising:

(i) at least one oxazoline and at least one polyol ester; and

(ii) a reaction product of at least one polyol diacrylate and at least one general antioxidant YH, wherein Y is selected from the group consisting of RS, $R_2N$, $(RO)_2PHO$, phenols and mixtures thereof, R is an aliphatic or cyclo-aliphatic group having from about 2 to 20 carbon atoms, S is a sulfur atom, N is a nitrogen atom, O is an oxygen atom, P is a phosphorus atom and H is a hydrogen atom, whereby the additives from the first (i) and second (ii) group function as antioxidants or antioxidant boosters, and additives from both groups (i) and (ii) are grafted to the basestock.

Claim 13. (Previously amended) The graft of claim 12 wherein RS is part of a sulfur containing antioxidant, $R_2N$ is an aromatic amine or an alkyl amine antioxidant and $(RO)_2PHO$ is a phosphite antioxidant.

Claim 14. (Previously amended) The graft of claim 12 wherein the additive has a hydroxyl number greater than about 30 and less than about 180.

Claim 15. (Previously amended) The graft of claim 12 wherein the additive has a hydroxyl number of greater than about 50 and less than about 120.

Claim 16. (Previously amended) The graft of claim 12 wherein the additive has a hydroxyl number of greater than about 70 and less than about 100.

Claim 17. (Previously amended) The graft of claim 12 wherein the antioxidant further comprising an antioxidant chosen from the group consisting of oxazolidines, amide esters, polyol esters and mixtures thereof.

Claim 18. (New) A lubricant comprising the graft of claim 12.

Claim 19. (New) The graft of claim 12 used as a lubricant.
